About Me

I am a proactive full-stack web developer with a passion for creating impactful user experiences. In my current role at DecOps, I lead the UX/UI development, overseeing a team of seven. My core strength lies in designing, building, and debugging front-end solutions. Accomplished in the latest front-end technologies, including Next.js, React, and Tailwind, I also possess expertise in back-end development using node.js among other platforms. Continually eager to learn, I have a solid grasp of emerging technologies such as blockchain and AI. This equips me to develop innovative solutions that not only enhance user experiences but also drive business growth and ensure sustainable success.

Skills

Programming & Development:
- Front-end Technologies
  - JavaScript (React, Next.js, Tailwind CSS)
  - Hydrogen Storefront (Shopify)
- Back-end Technologies
  - Node.js (Express.js, Sequelize.js, Socket.io)
- Database Management: PostgreSQL
- Blockchain Development: Solidity
- Tools & Middleware:
  - Git, Passport.js, JWTs, APIs

Management & Communication:
- Project & Product Management
- Start-up Initiatives & Development
- Strategic Partnerships
- Community Development & Management
- Coaching & Team Leadership

Experience

UX/UI Leader & Full Stack Web Developer
DecOps
July 2023 - Present
- Elevated to the role of UX/UI Leader, where I am direct the user experience and interface development, guiding and overseeing a team of seven developers.
- Collaborate directly with the lead developer on the evolution of SimpFi.Ai, a sophisticated platform geared towards AI-driven automation of operational workflows.

- Drive the design and development of intuitive, user-friendly interfaces, ensuring alignment with business objectives and user needs.
- Take on a proactive role in client-side development, encompassing the creation of innovative features and improvement of existing ones.

Social & Community Growth Lead

ShapeShift.com & The ICHI Foundation

April 2021 - July 2022

- Led a community development team of four, ensuring the fusion of product development with effective marketing, strategic partnerships, and active community engagement.
- Spearheaded community management and engagement initiatives.
- Provided assistance to online investors navigating ICHI's DeFi ecosystem.
- Played a key role in expanding the protocol to exceed $70 million in value.

Projects

SimpFi.Ai (Current)

Technologies: TypeScript, React, Tailwind CSS, Next.js

➔ An AI-driven platform for workflow automation. Built with React-Flow, our team has developed a multi-node architecture that leverages AI for linear and parallel workflows.

Arbitrum Analytics Dashboard

Technologies: JavaScript, React, Next.js, Redux, Node.js, Express.js, Tailwind CSS, PostgreSQL, Sequelize.js, Passport.js, Simple JWT

➔ Developed a full-stack blockchain analytics tool for enhanced data-driven insights.

Trading Analysis App

Technologies: React, Redux, Tailwind CSS

➔ Front-end application to analyze market data, manage favorites, and read market news.

Mobile Fitness App

Technologies: JavaScript, Tailwind CSS, Node.js, Express.js, Sequelize.js, PostgreSQL, Passport.js, Cookie Session, bcryptjs

➔ Craft your personal fitness profile, connect with others, and track your training.

Education

Full-Stack Web Development

Mar 2023 - July 2023 (17 Weeks, Full-Time Remote)

DigitalCrafts is a top-tier coding bootcamp where I honed my skills in:

- Front-end: HTML, CSS, JavaScript, React, Next.js
- Back-end: Node.js, Express.js, API integration
- Database Management: PostgreSQL with Sequelize.js
- Messaging, Auth, and Local Storage: Redux & JWTs for local storage and sessions, Socket.io for real-time interactions, and Passport.js for encrypted authentication
